

Mid Valley Pipeline Spill Update for 10/22/2014

- There are 300 total personnel working the Response.
- Total estimated liquid recovery to date is approximately 2870 bbl. of crude oil
- 2321 bbl. of recovered crude oil has been transported off-site and recycled at Sunoco's Haynesville Station, in Haynesville, LA.
- No impacts to Caddo Lake have been reported
- The pipeline spill origin point has been excavated, isolated and wrapped in preparation for removal under the supervision of PHMSA. The new section of the pipe has been installed and testing will be done over the next few days.
- A pathway has been created along the entire stretch of the impacted creek using shredders for access
- 11 reptiles captured, 10 reptiles cleaned, 2 reptiles released, 39 reptiles dead on arrival. 1 bird captured, 1 bird cleaned, 2 birds dead on arrival. 280 dead fish have been collected. A total of 432 animals have been found dead on arrival.
- The UC is working on a Weather Contingency Plan to deal with any potential rain event.
